TERMS OF ACCEPTANCE

When a patient seeks Chiropractic health care and we accept a practice member for such care, it is essential for both to be working towards the same objective. Chiropractic has only one goal. It is important that each practice member understands both the objective and the method that will be used to obtain it. This will prevent any confusion.

Adjustment: An adjustment is the specific application of forces to facilitate the body's correction of subluxation. Our Chiropractic method of correction is by specific, gentle adjustments.

Health: A state of optimal physical, mental and social well-being, not merely the absence of disease or infirmity.

Subluxation: An impediment in the brain and nervous system which causes alteration of nerve function and interference to the transmission of mental impulses, resulting in a lessening of the body's innate ability to regulate and heal itself. Subluxations appear as the colored bars on the computer scans.

We do not offer to diagnose or treat any disease or condition other than subluxation. However, if during the course of a chiropractic examination, we encounter non-chiropractic or unusual findings, we will advise you. If you desire advice, diagnosis or treatment for those findings, we will recommend that you seek the services of a health care provider who specializes in that area.

Regardless of what the disease is called, we do not offer to treat it. Nor do we offer advice regarding treatment prescribed by others. OUR ONLY PRACTICE OBJECTIVE is to eliminate a major interference to the expression of the body's innate wisdom. Our only method is specific adjusting to correct subluxations.

I, _____ being parent or legal guardian of _____
(Print Name) (Print Name)

have read and fully understand the above statements. I hereby grant permission for my child to receive chiropractic care.
